Material safety data sheet

Stainless steel welding flux

Date of issue: Feb 2007 (Issue 2: Rev 2)
Document: Avesta Welding MSDS TE 20-07

1. IDENTIFICATION OF PREPARATION AND COMPANY

Product identifier: Avesta Stainless Steel Welding Flux
Manufacturer/Supplier: Avesta Welding, P O Box 501, SE-774 27 AVESTA, SWEDEN
Telephone number: +46 226 85700
Application and use: Submerged arc welding

Trade names:

2. INFORMATION OF INGREDIENTS

This product is manufactured by agglomeration of calcined minerals.

Flux ingredients:

*) Threshold Limit Values acc. to ACGIH "hazard classification OJEC L314".

3. HAZARDS IDENTIFICATION

When these products are used in a welding process the following hazards are the most important.

Heat: Spatter, melting metals and arc rays can cause burn injuries and start fires.
Radiation: Arc rays can severely damage eyes or skin.
Shock: Electrical shock can kill.
Fumes: Chronic overexposure to welding fumes may affect pulmonary functions.

4. FIRST AID MEASURES

General: Move to fresh air and call for medical aid.
Inhalation: If breathing is difficult, provide fresh air and call physician.
Eye contact: For radiation burns due to arc flash, seek medical attention.
Skin contact: For skin burns from arc radiation, seek medical attention.

5. FIRE-FIGHTING MEASURES

No specific for welding consumables.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions: chapter 8.
Environmental precaution: chapters 12 and 13.

7. HANDLING AND STORAGE

Handling: Do not ingest. Handle with care to avoid stings and cuts. Spooled wire can spring.
Storage: Stored in original packaging. Keep separate from chemical substances like acids which could cause chemical reactions.

8. EXPOSURE CONTROLS/PERSO ANAL PROTECTION

Engineering measures: Ensure sufficient ventilation and exhaust at the arc, to keep the welding fumes and gases away from welders breathing zone. Keep working place and protective clothing clean and dry. Train welder to avoid contact with live electrical parts and insulate conductive parts. Check condition of protective clothing and equipment on a regular basis.
Personal protective equipment: Use respirator or air supplied respirator when welding in a confined space. Wear hand, head, eyes and body protection like welders gloves, helmet or face shield with filter lens, safety boots, apron, arm and shoulder protection. Keep protective clothing clean and dry.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Solid, non-volatile.
Odour: Odourless.
Colour: Greyish.
Solubility in water: Insoluble.
10. STABILITY AND REACTIVITY

General: This product is intended for normal welding purposes. Stability: Stable under normal conditions. Reactivity: May react in contact with strong acids to release gaseous acid decomposition products. Fume is produced during welding. Expected fume constituents include oxides of metal as iron, manganese, nickel and chromium. Expected gaseous products would include carbon oxides, nitrogen oxides and ozone. Contamination, dirt, surface protections, paint or primer on the base material can affect the composition of the fumes.

Fume composition (wt %):

11. TOXICOLOGICAL INFORMATION

General: Inhalation of welding fumes, dust and gases can be dangerous to your health. Classification of welding fumes is difficult because of varying base materials, coatings, air contamination and processes.

Acute toxicity: Overexposure to welding fumes and dust may result in symptoms like dizziness, nausea, dryness or irritation of the nose, throat or eyes.

Chronic toxicity: Overexposure to welding fumes and dust may affect pulmonary function. Welding fumes and dust may contain chromium and nickel compounds, e.g. Cr6+, which are suspected of being cancer causing agents.

Dermatological toxicity: Nickel is classified as a skin sensitisier. Can cause skin sensitisation in susceptible individuals through prolonged contact with the skin.

12. ECOLOGICAL INFORMATION

Welding consumables and materials could degrade into components originating from the consumables or from the materials used in the welding process.

13. DISPOSAL CONSIDERATIONS

Surplus and scrap (waste) are valuable commodities that can be reused. Products, surplus and packaging should, if possible, be recycled or discarded in full compliance with federal and local regulations.

14. TRANSPORT INFORMATION

No international regulations or restrictions are applicable.

15. REGULARITY INFORMATION

Products with nickel equal to or exceeding 1% are classified, but are not required to be labelled by virtue of their massive non-hazardous form - preventing inhalation, ingestion and prolonged, continuous contact.

Classification of Nickel

</tr>
</tbody>
</table>

Warning text on label:

WARNING: Fumes and gases can be hazardous to your health. Arc rays can injure your eyes and burn skin. Electric shock can kill. Read and understand the manufacturer’s instructions and your employer’s safety practices. Keep your head out of the fumes. Use enough ventilation, exhaust at the arc, or both, to keep fumes and gases from your breathing zone and the general area. Wear correct eye, ear and body protection. Do not touch live electrical parts.

This product contains or produces a chemical known to the State of California to cause cancer and/or birth defects (or other reproductive harm). (California Health and Safety Code § 25249.5 et seq.)

VÄLTL HITSUSSAVUJEN SISÄNHEHTIÖMÄSTÄMÄSTÄ:

WAARSCHUWING: Neem uw voorzorgen bij het lassen, ventileer de gebruiksruimte. Raadpleeg de veiligheidsvoorschriften van uw werkgever die moeten overeenstemmen met de nationale wetten/richtlijnen en die moeten gebaseerd zijn op de gegevens beschikbaar bij uwleverancier.

ADVERTENCIA: Utilizar sistemas de extracción de aire. Los humos y los gases pueden ser peligrosos para la salud. Leer con atención las instrucciones y utilizar los elementos de protección adecuados.

ATTENZIONE: Durante l’impiego assicurarsi che la zona di lavoro, sia sufficientemente aerata. Fumi e gas possono essere nocivi per la salute. Leggere attentamente le istruzioni del produttore e attenersi alle disposizioni di sicurezza del vostro datore di lavoro.

16. OTHER INFORMATION

We refer to:

UK: WMA Publication 236 and 237. “Hazards from Welding fume”, “The arc welder at work, some general aspects of health and safety”.

Germany: Unfallverhütungsvorschrift “Schweißen, Schneider und verwandte Verfahren” (VBG 15)

Avesta Welding requests the users of this product to study this Safety Data Sheet and become aware of product hazards and safety information. The information given in this safety data sheet is based on the present level of our knowledge and experience. The data sheet describes the products with respect to safety requirements. The data given is not intended as a confirmation of product properties and does not constitute a legal contractual relationship, nor should it be used as basis for ordering these products.
